

In the U.S., a train derails or collides with an object every **hour and a half**.\*

What if that were **your train, your route...**

**...your city?**

We have a train derailment at Generica West Rail.

\* U.S. Department of Transportation

Multiple calls are coming in about a derailment.

We've got fire and EMS en route to Generica West Rail.

Active fire and entrapment. Multiple injuries.

We need traffic diverted from 2nd and 3rd Avenue.

I see the collaboration channel has six agencies active.

The collaboration channel connects city agencies and helps coordinate actions.

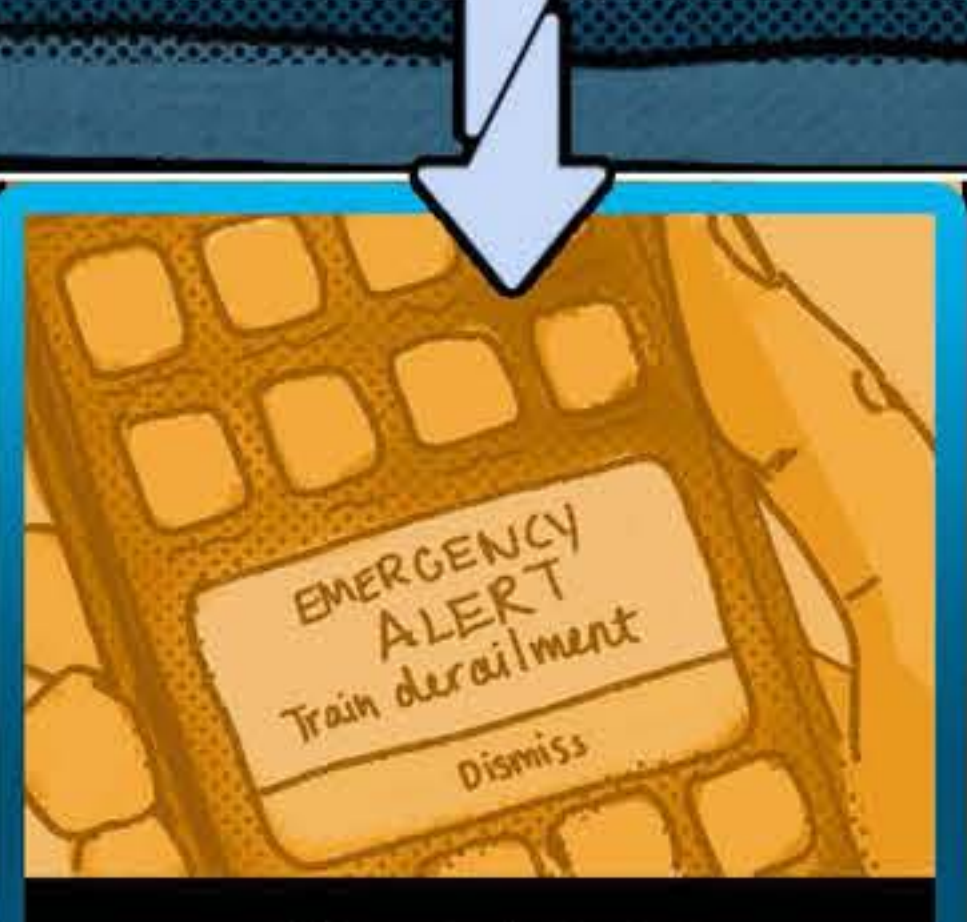

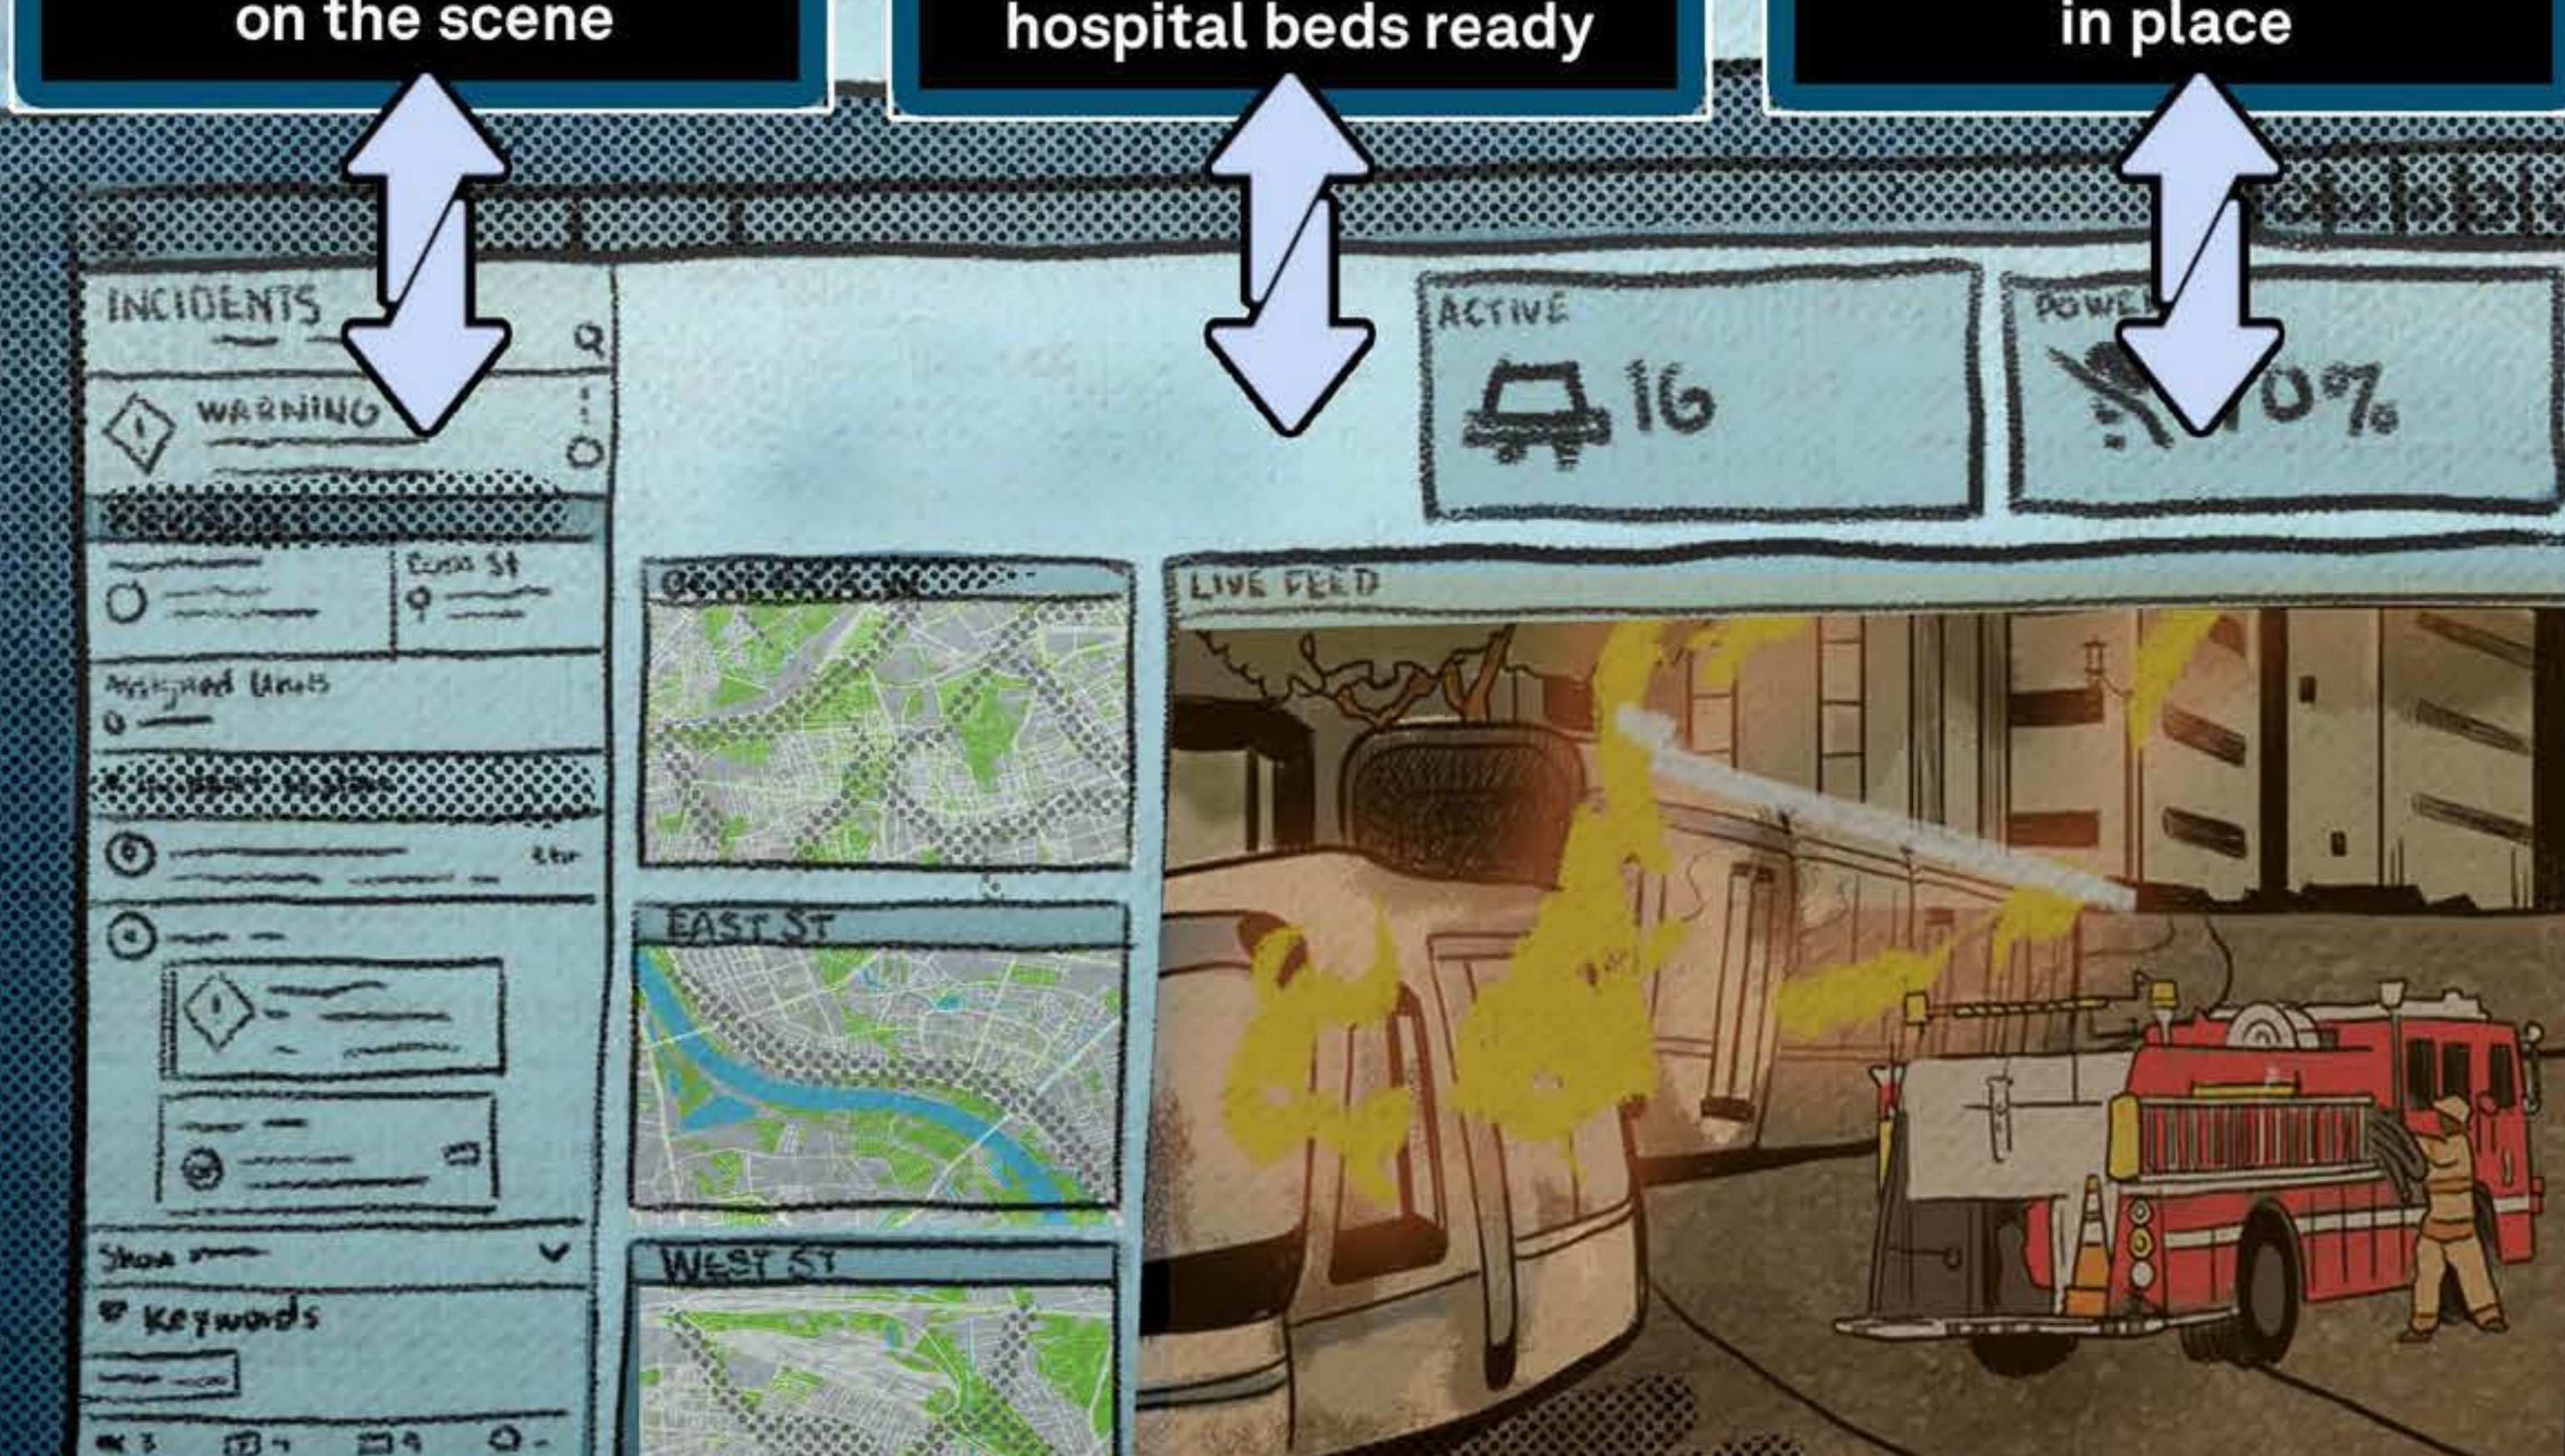

Emergency services on the scene

Red Cross deployed, hospital beds ready

Traffic blockade in place

Emergency declaration

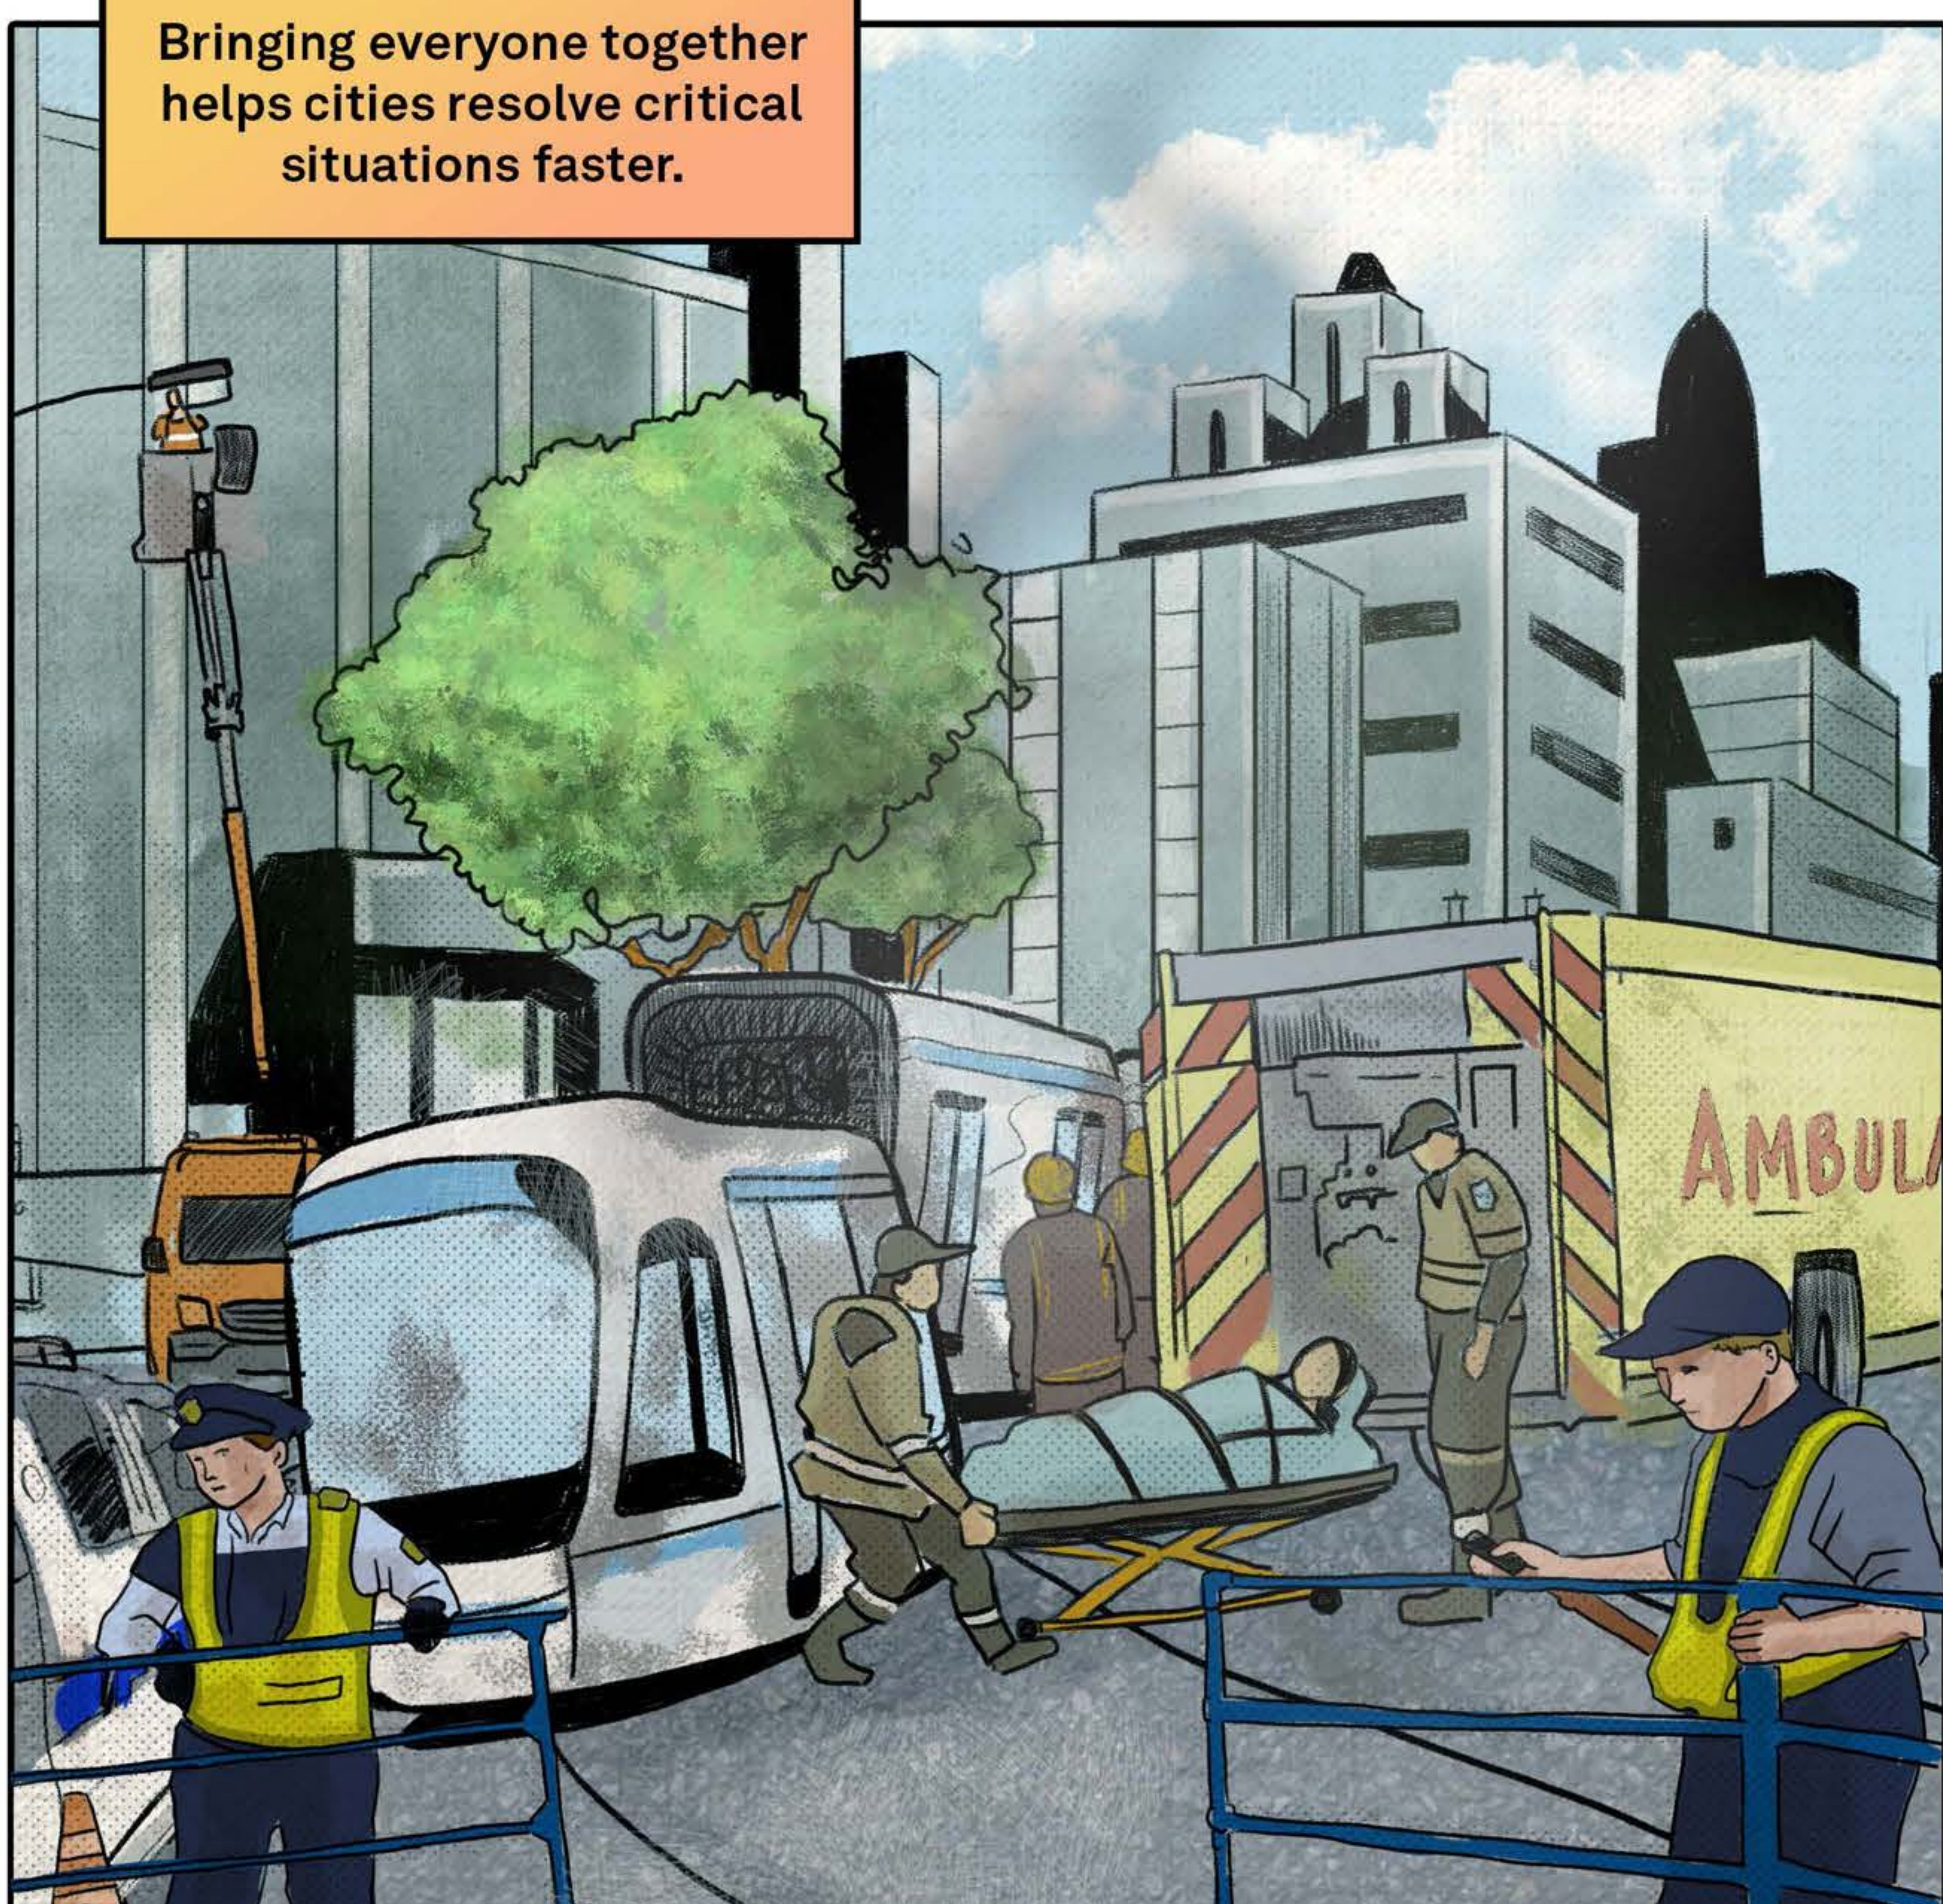

City announcements

Utilities working to restore power

Real-time updates result in wider shared awareness.

Bringing everyone together helps cities resolve critical situations faster.

Unexpected events can't be predicted... but you can be **ready**.
